

Collaboration Overview

This document explains how our collaboration works, what support you receive, and how the revenue structure is organized.

The main goal is to help you secure better job opportunities faster, improve your interview performance, and build a stable and scalable income stream through structured support.

1. What You Will Get

Job Opportunities

- We help you find job roles that match your skills and experience
- Focus on stable full-time roles and high-quality opportunities
- Access to additional freelance or side opportunities when available

Career Growth

- Strong improvement in interview and communication skills
- Exposure to different companies, roles, and hiring processes
- Better positioning of your engineering profile in the market

Full Support System

- Resume optimization for each job application
- Job search and application handling
- Interview scheduling and coordination
- Preparation and guidance before interviews
- Continuous support during the hiring process

2. What We Will Do for You

Resume & Applications

- Tailor your CV for each specific job description
- Apply only to relevant and high-match positions
- Improve visibility and increase interview call rate

Interview Management

- Coordinate interview schedules with companies
- Share all important details in advance
- Help you stay fully prepared before each stage

Interview Preparation

- 30-minute focused preparation before interviews
- Review job requirements, company background, and questions
- Help structure your answers in a clear and professional way

3. How Interview Support Works

Before the Interview

- Preparation session (~30 minutes) before each interview
- We go through key topics, expectations, and possible questions
- You receive guidance on how to present your experience

During the Interview

- You attend the interview via the official meeting link
- You answer using your real experience and knowledge
- The focus is on preparation and readiness, not interruption

After the Interview

- We review feedback and results together
- Improve answers and strategy for next interviews

4. Revenue Sharing & Opportunity Model

First Job / First Opportunity

- If we secure your first job or project, you can choose to work directly
- In this case, the revenue split is typically:
 - **80% for you**
 - **20% for our team**
- This covers application support, preparation, interview assistance, and ongoing guidance

Additional Jobs / Multiple Opportunities

- After the first placement, we aim to secure additional roles or projects
- For these additional opportunities, our team can fully manage the process
- In this case, the revenue structure is typically:
 - **20% for you**
 - **80% for our team** (negotiable depending on scope and involvement)

Important Note

- All revenue-sharing terms are agreed transparently before starting any job process
- Nothing is final until both sides confirm and agree
- The structure is flexible depending on workload, responsibility, and involvement

5. Flexibility & Expectations

Time Commitment

- We respect your personal time and schedule
- You only attend scheduled interviews and preparation sessions
- No unnecessary time pressure or daily obligations

Transparency

- No control over your personal accounts or private data
- All communication and steps are agreed in advance
- Clear and professional handling of all processes

Cooperation

- We may need your input for CV updates, confirmations, and interview coordination
- Fast communication helps improve results and speed

6. Purpose of Collaboration

- Help you secure better and more consistent job opportunities
- Increase your income potential through structured placements
- Improve your technical and communication skills
- Provide end-to-end support in a competitive job market
- Build a long-term collaboration focused on growth and results
