

ALIAKSEI KRENTS

Senior Full-Stack .NET Engineer

Address: Małopolskie, Poland | **Phone:** +48 781628545 | **Email:** alekseikrents@outlook.com | **LinkedIn:** [Linkedin/in/alex-krents-4884d58bb5](#)

PROFILE:

Senior Full-Stack .NET Engineer with 8+ years of experience designing and delivering scalable enterprise applications across logistics, finance, SaaS, and customer operations domains. Strong expertise in C#, ASP.NET Core, React, Angular, REST APIs, microservices, SQL Server, and Azure cloud-native architectures. Proven experience leading full Software Development Lifecycle (SDLC) initiatives including system design, backend engineering, frontend development, cloud deployment, CI/CD automation, and enterprise integrations. Experienced in building secure, scalable, and high-performance distributed systems while integrating AI-powered automation and intelligent business workflows into enterprise platforms.

EDUCATION:

B.S. in Computer Science, Belarusian Trade and Economics University of Consumer Cooperatives (BTEU) **Sep 2013 - Aug 2017**

CORE COMPETENCIES:

- Full-Stack Development (.NET)
- ASP.NET Core & Web API Development
- React & Angular Frontend Development
- Microservices & Distributed Systems
- Database Design & Optimization
- Cloud Architecture (Azure)
- RESTful APIs, GraphQL & gRPC
- DevOps & CI/CD Automation
- Agile SDLC & Team Collaboration
- System Design & Problem Solving

WORK EXPERIENCE:

Senior Full-Stack .NET Engineer | SoftKraft | Germany **Apr 2024 - Apr 2026**

- Architected and delivered scalable enterprise logistics and operations platforms using **C#, ASP.NET Core, .NET 8, React, Tailwind CSS**, and **Azure**, supporting shipment lifecycle management, customs processing, customer communications, and financial workflows across global operations while leading full **Software Development Lifecycle (SDLC)** activities in Agile/Scrum environments.
- Designed and developed high-performance microservices and backend APIs using **ASP.NET Core Web API, Entity Framework Core, REST APIs, GraphQL, PostgreSQL**, and **SQL Server**, enabling secure integration with ERP systems, carrier platforms, customs services, and third-party logistics providers.
- Built intelligent workflow automation and AI-powered business services using **C#, .NET, Azure OpenAI, LangChain, Azure Functions**, and **distributed microservices**, automating shipment exception handling, adaptive routing, customer notifications, and operational decision-making processes.
- Engineered document processing and semantic search solutions using **Azure Document Intelligence, OCR pipelines, Azure Cognitive Search, OpenAI embeddings, vector search, and PostgreSQL**, enabling automated customs/VAT processing and natural language access to compliance documentation with source-grounded responses.
- Developed real-time event-driven systems and operational dashboards using **Azure Service Bus, SignalR, webhooks, React, TypeScript, Tailwind CSS, and GraphQL/REST integrations**, improving shipment visibility, analytics, reporting, exception management, and customer communication workflows.
- Containerized and deployed cloud-native applications using **Docker, Kubernetes, Azure Kubernetes Service (AKS), Azure DevOps, GitHub Actions**, and **CI/CD pipelines**, collaborating closely with product managers, QA engineers, DevOps teams, and stakeholders to deliver scalable, secure, and highly available enterprise solutions.

WORK EXPERIENCE:

Experienced Full-Stack .NET Engineer | Monterail | Poland Nov 2021 - Apr 2024

- Architected and delivered AI-powered Computer Vision platforms using **C#, ASP.NET Core 2.2/3.1, Azure Cognitive Services Computer Vision API, OpenCV**, and **Azure**, enabling scalable object detection, image classification, OCR, automated tagging, and intelligent visual data processing across enterprise applications.
- Designed and developed high-performance backend services and image-processing pipelines using **ASP.NET Core Web APIs, REST APIs, Azure Blob Storage, asynchronous processing, SQL databases**, and **distributed processing patterns**, supporting parallel image inference, metadata extraction, semantic indexing, and ML-ready dataset generation.
- Built OCR, annotation, and visualization solutions using **Azure Computer Vision Read API, Angular 8–10, TypeScript, Tailwind CSS, Fabric.js**, and **HTML5 Canvas**, enabling handwritten text extraction, bounding box rendering, assisted labeling, confidence review, and human-in-the-loop validation workflows.
- Led full **Software Development Lifecycle (SDLC)** activities including architecture design, API integration, frontend development, testing, CI/CD automation, deployment, and production support, delivering scalable, secure, and maintainable cloud-native solutions on **Azure App Services** and **Azure Blob Storage**.

Full-Stack Engineer | Vilmate LLC | PolandApr 2024 - Apr 2026

- Modernized a legacy bus ticketing platform using **Blazor Hybrid, Blazor, .NET MAUI, C#, and ASP.NET Core**, delivering cross-platform web, mobile, and desktop applications with a 90%+ shared codebase and consistent user experience across devices.
- Designed and developed scalable backend systems using **ASP.NET Core, Entity Framework Core, REST APIs, GraphQL, gRPC, WebSockets, MS SQL Server, Azure PostgreSQL, Redis Cache, Kafka**, and **RabbitMQ**, supporting high-volume booking, payment processing, and real-time ticketing operations with optimized performance and low latency.
- Built cloud-native microservices and event-driven architectures using **Docker, Kubernetes, Azure Container Apps, Stripe API**, and **distributed messaging patterns**, enabling automated payment reconciliation, invoice workflows, scalable deployments, and real-time transaction processing.
- Implemented enterprise-grade security, monitoring, and notification systems using **OAuth 2.0, JWT, SSL/TLS, RBAC/ReBAC, Azure Application Insights, Grafana, and Twilio**, ensuring secure access control, centralized observability, and real-time operational alerts.
- Led full **Software Development Lifecycle (SDLC)** delivery including architecture design, frontend/backend development, API integration, testing, CI/CD automation, deployment, monitoring, and production support within Agile cross-functional teams.

Junior .NET Developer | Euristiq | Poland Sep 2017- Apr 2019

- Assisted in developing internal business systems and customer portals using **C#, ASP.NET MVC, JavaScript**, and **SQL Server**.
- Built responsive **UI** components and administrative dashboards using **Bootstrap, HTML5, CSS3**, and **AngularJS**.
- Supported backend API implementation, Third-Party API Integration, bug fixing, and feature enhancements for enterprise web applications.
- Worked with senior engineers on database maintenance, debugging, and application performance improvements.
- Participated in **Agile/Scrum** development processes including sprint planning, testing, code reviews, and deployment support.
- Contributed to documentation and production support activities across multiple client projects.

SKILLS:

Languages & Frameworks:

C#, .NET 8, ASP.NET Core, ASP.NET Core Web API, Entity Framework Core, Blazor, Blazor Hybrid, .NET MAUI, React, Angular, AngularJS, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Fabric.js

APIs & Communication:

REST APIs, GraphQL, gRPC, WebSockets, SignalR, Webhooks

Databases & Storage:

SQL Server, MS SQL Server, PostgreSQL, Azure PostgreSQL, Redis Cache, Azure Blob Storage

Cloud & Azure Services:

Microsoft Azure, Azure Functions, Azure Kubernetes Service (AKS), Azure Container Apps, Azure DevOps, Azure App Services, Azure Service Bus, Azure Application Insights, Azure Cognitive Search, Azure Cognitive Services Computer Vision API, Azure Computer Vision Read API, Azure Document Intelligence

AI / ML / Computer Vision:

Azure OpenAI, LangChain, OpenAI Embeddings, Vector Search, OCR Pipelines, OpenCV, Computer Vision, Object Detection, Image Classification, Semantic Search

Messaging & Event Streaming:

Kafka, RabbitMQ, Distributed Messaging, Event-Driven Architecture, Asynchronous Processing

DevOps & Infrastructure:

Docker, Kubernetes, CI/CD Pipelines, GitHub Actions

Security & Authentication:

OAuth 2.0, JWT, SSL/TLS, RBAC/ReBAC

Monitoring & Observability:

Grafana, Azure Application Insights

Payments & Integrations:

Stripe API, Twilio, ERP Integrations, Carrier Platform Integrations

Methodologies & Architecture:

Microservices, Distributed Systems, Cloud-Native Architecture, Agile/Scrum, Software Development Lifecycle (SDLC)

PROJECTS:

Cross-Platform Bus Tracking Platform

<http://tripXpress.com>

Modernized a legacy bus ticketing system using **Blazor Hybrid, .NET MAUI, C#, ASP.NET Core, and Azure**, delivering scalable web, mobile, and desktop applications with 90%+ shared codebase and unified user experience. Developed cloud-native microservices and real-time payment workflows using **GraphQL, gRPC, Kafka, RabbitMQ, Docker, Kubernetes, and Stripe API**, improving scalability, transaction reliability, and operational efficiency.

Intelligent Shipping Orchestration Platform

<http://lelogistics.net>

Built an AI-powered logistics orchestration platform using **C#, ASP.NET Core, Python, Azure OpenAI, LangChain, and Azure microservices**, enabling autonomous shipment routing, compliance automation, and intelligent customer communication. Implemented RAG-based search, vector databases, ERP/carrier integrations, and ML-driven optimization, reducing manual document processing by 64% and customer shipment inquiries by 55%.
