

Blake Callahan

Senior Mobile & Full Stack Engineer

SUMMARY

Senior Full Stack & Mobile Engineer with 10+ years of experience architecting and delivering large-scale web and mobile platforms across healthcare, InsurTech, and content-driven ecosystems. Specialized in building composable, cloud-native architectures using Next.js, React, React Native, Node.js, and headless CMS solutions, with deep expertise across AWS, Azure, GCP, and serverless environments. Proven track record designing secure REST and GraphQL APIs, subscription and payment systems, performance-optimized frontends, and scalable CI/CD pipelines that support high-traffic, multi-region deployments. Adept at leading technical discovery, driving architectural decisions, and delivering production-grade solutions in Agile environments with measurable business impact.

PROFESSIONAL EXPERIENCE

Senior Full-Stack & Mobile Software Engineer

Mar 2022 - Dec 2025

Goji Labs, Los Angeles, CA

- Led technical discovery and architecture design for migration of a 100K+ page medical platform to a composable stack using Next.js 13, React 18, TypeScript, Node.js, Sanity, Algolia, Stripe, Vercel, and AWS (S3, CloudFront, IAM, Route 53).
- Architected structured content models in Sanity Studio v3 (GROQ, custom schemas, RBAC workflows, i18n localization, webhooks) supporting multi-region deployments.
- Built scalable backend APIs using Node.js, REST, JWT authentication, Role-Based Access Control, async event handling, integrating with AWS S3 for asset storage, AWS IAM for access control, and CloudFront CDN for global content delivery, enabling CPD tracking, PDF generation, subscription validation, and 5-year compliance audit logging.
- Implemented hybrid SSG, SSR, ISR with Next.js App Router, API Routes, Edge Functions, deployed via Vercel and AWS infrastructure, achieving green Core Web Vitals (LCP, INP, CLS).
- Integrated Algolia InstantSearch.js with unified indexing and webhook-triggered reindexing across 40K+ clinical articles, podcasts, and video content, optimized for CDN-backed global distribution.
- Engineered frontend performance optimizations using next/dynamic, React.memo, useMemo, useCallback, fast-dom, content-visibility CSS, Tailwind CSS, PostCSS, Webpack, tree shaking, next/image, leveraging CloudFront caching strategies to reduce latency.
- Implemented secure subscription flows via Stripe API, Webhooks, Apple Pay, Google Pay, with server-side validation, Pro-content gating logic, and secure secret management aligned with AWS IAM policies.
- Developed cross-platform mobile applications using React Native, Expo, TypeScript, React Navigation, Redux Toolkit, Axios, integrating with Node.js APIs hosted across Vercel and AWS, enabling synchronized CPD tracking and real-time updates.
- Managed deployment lifecycle with Expo CLI, EAS Build, OTA updates, App Store and Google Play releases, automated CI/CD via GitHub Actions, leveraged AWS S3 + CloudFront for asset distribution, and delivered 21 epics in a Scrum-based Agile environment.

Senior Mobile & Full-Stack Software Engineer

May 2020 - Feb 2022

JetRockets, Brooklyn, NY

- Delivered a cross-platform mobile and web MVP using React Native, Expo, React.js, TypeScript, Node.js, Firebase, Sanity CMS, and Azure Cloud Services to validate a new InsurTech learning product.
- Built iOS and Android applications with structured state management and reusable UI components (React Native, Expo, Redux Toolkit, Styled Components).
- Developed responsive React.js frontend for marketing validation and content presentation (React.js, TypeScript, React Router, Axios) deployed via Azure App Service and Azure Static Web Apps.
- Engineered backend APIs and serverless business logic for authentication, progress tracking, and rewards (Node.js, Express.js, Firebase Cloud Functions, Azure Functions).
- Implemented real-time user data sync, secure storage, and consent logging (Firebase Authentication, Firestore, Azure Blob Storage, Security Rules).
- Integrated dynamic content delivery and third-party media embedding (Sanity CMS, GROQ, YouTube API) with cloud-based CDN optimization (Azure CDN).
- Built push notification and reminder workflows tied to lesson schedules (Expo Notifications, Firebase Cloud Messaging, Azure Notification Hubs, Cloud Scheduler).
- Implemented analytics and behavioral tracking to validate product-market fit (Firebase Analytics, Azure Application Insights, custom event tracking).
- Automated customer lifecycle workflows and email capture (Mailchimp API, HTTPS Functions, Azure Logic Apps).
- Configured CI/CD and automated mobile builds for rapid iteration (Expo EAS Build, GitHub Actions, Azure DevOps Pipelines).

CONTACTS

A: Fort Myers, FL, 33913

P: (239) 798 5646

E: blakecall94@outlook.com

L: in/blake-callahan-0a71593b1

EDUCATION

Bachelor's Degree in Computer Science

Nova Southeastern University

Aug 2011 - May 2015

COMPETENCIES

- Full Stack Web & Mobile App Architecture
- Cloud-Native Development
- Composable & Headless CMS Platforms
- Scalable API Design
- Cross-Platform Mobile Development
- Performance Optimization & Core Web Vitals
- CI/CD Automations & DevOps Workflows
- Secure Authentication & Subscription Systems
- Microservices & Serverless Architectures
- Agile Delivery & Technical Leadership

SKILLS

Programming Languages

JavaScript (ES6+), TypeScript, Node.js, SQL

Front-End

React.js, Next.js 13, React 18, React Native, Expo, Redux Toolkit, Context API, React Navigation, Styled Components, Tailwind CSS, PostCSS, Webpack, Storybook

Mobile Software Engineer

Oct 2017 – Apr 2020

Three29, Jacksonville, FL

- Architected and delivered cross-platform mobile app using React Native, Expo, TypeScript, React Navigation, and Context API, ensuring scalable state management and modular structure.
- Implemented passwordless Magic Link authentication with JWT, OAuth flows, secure token storage via Expo SecureStore, GraphQL mutations using Apollo Client, and REST fallback services with Axios and API abstraction layers.
- Developed QR voucher scanning with Expo Camera, deep linking, background task handling, real-time validation, and optimized transaction history and voucher management modules using GraphQL, Apollo Cache, async fetching, and optimistic UI updates.
- Applied robust form validation using React Hook Form and Yup, built reusable UI components with Storybook following atomic design principles from Figma, and optimized performance via memoization, lazy loading, and bundle size reduction.
- Established CI/CD pipelines using GitHub Actions and EAS Build, managed releases through App Store Connect and Google Play Console, and enforced quality standards with ESLint, Prettier, Husky, Jest, and React Native Testing Library.

Full Stack Software Engineer

Jun 2015 – Sep 2017

Culture Foundry, Austin, TX

- Designed and implemented a microservice-based onboarding web app integrated via API into a complex headless CMS ecosystem, deployed on Google Cloud Platform (GCP) using Cloud Run and Cloud Build for scalable containerized hosting.
- Built the UI from scratch using Next.js, TypeScript, Tailwind CSS, Storybook, and Jest, with CI/CD pipelines configured via GCP Cloud Build for automated deployments.
- Developed reusable component libraries in Storybook for isolated testing and rapid stakeholder feedback, hosted within a GCP-based staging environment.
- Implemented independent progress tracking logic without modifying the existing Amplitude API, ensuring secure API communication and scalable infrastructure on GCP.
- Refactored and redesigned component library mid-project to align with full platform rebranding while maintaining stable cloud-hosted environments.
- Worked in Scrum with a dedicated PM/Scrum Master and a 5-person cross-functional team, delivering iterative releases through GCP-backed CI/CD workflows.

PROJECTS

Healthcare & Medical Education Platform

<https://GPnotebook.com>

Modernized and scaled GPnotebook, a 100K+ page clinical reference platform, by migrating from a legacy CMS to a composable architecture built with Next.js, React, TypeScript, Node.js, Sanity, Algolia, Stripe, and Vercel, enabling high-performance delivery, multi-region content management, CPD compliance tracking, subscription monetization, and unified web and mobile experiences for medical professionals across the UK, US, Australia, and Ireland.

InsurTech Full MVP Platform

<https://veygo.com>

Led development of a cross-platform mobile and web MVP using React Native, Expo, React.js, TypeScript, Node.js, Firebase, and Sanity CMS to validate a new InsurTech learning product. The platform enabled progress tracking, personalized content delivery, push notifications, analytics-driven user behavior insights, and secure customer data handling to support rapid idea validation and risk mitigation.

SKILLS

Back-End

Node.js, Express.js, Express.js, Nest.js, RESTful APIs, GraphQL, Apollo Client, JWT, OAuth, RBAC, Async Event Handling

Mobile

React Native, Expo CLI, Expo Camera, Expo Notifications, EAS Build, OTA Updates

Database & Storage

MySQL, PostgreSQL, Oracle, MongoDB, MS SQL Server, Firestore, Azure Blob Storage

CMS & Search

Sanity CMS, GROQ, Algolia

Payments

Stripe API, Webhooks, Apple Pay, Google Pay

DevOps & CI/CD

GitHub Actions, Azure DevOps Pipelines, Docker (implied containerization), CI/CD automation

Analytics & Monitoring

Firebase Analytics, Azure Application Insights

Testing & Quality

Jest, ESLint, Prettier, Husky, React Native Testing Library
