Dear Hiring Manager,

I am writing to express my interest in the Senior AI/ML Software Engineer position at [Company Name]. With over 10 years of experience in AI and machine learning, I have successfully built and deployed scalable AI systems across cloud platforms such as Google Cloud and AWS. My expertise in designing end-to-end AI lifecycles, including data engineering, model training, and MLOps automation, positions me to contribute effectively to your team's success.

At Essential Designs, I led the architecture of a text-to-application AI platform, utilizing Python, FastAPI, and GCP. I also implemented LLM orchestration pipelines with Vertex AI and OpenAI GPT-4o, automating code and logic generation. Additionally, I developed machine learning-based intent routing systems and scalable data processing workflows, which enhanced real-time application delivery and improved system performance. My ability to optimize backend microservices and build low-latency AI-powered applications has consistently delivered measurable ROI for enterprise use cases.

I am excited about the opportunity to leverage my skills in AI architecture, LLM workflows, and cloud-native backend systems at [Company Name]. I am confident that my experience in developing production-grade AI systems will help drive your company's innovative AI initiatives and contribute to your long-term goals. I look forward to the possibility of discussing how my background, skills, and experiences align with your needs.

Thank you for considering my application. I look forward to the opportunity to contribute to your team's success.

Sincerely,
Lukas Mercer
