

Ryan Sullivan

Senior Full Stack & Mobile Engineer

SUMMARY

Senior Full Stack & Mobile Engineer with 10+ years of experience architecting and delivering large-scale web and mobile platforms across healthcare, InsurTech, and content-driven ecosystems. Specialized in building composable, cloud-native architectures using Next.js, React, React Native, Node.js, and headless CMS solutions, with deep expertise across AWS, Azure, GCP, and serverless environments. Proven track record designing secure REST and GraphQL APIs, subscription and payment systems, performance-optimized frontends, and scalable CI/CD pipelines that support high-traffic, multi-region deployments. Adept at leading technical discovery, driving architectural decisions, and delivering production-grade solutions in Agile environments with measurable business impact.

PROFESSIONAL EXPERIENCE

Senior Full-Stack & Mobile Software Engineer

Apr 2023 - Nov 2025

Orangesoft | San Francisco, CA

- Led technical discovery and system architecture, and SDLC planning for migration of a 100K+ page medical platform to a composable stack using Next.js 13, React 18, TypeScript, Node.js, Sanity, PostgreSQL, Algolia, Stripe, Vercel, AWS (S3, CloudFront, IAM, Route 53), React Native, Expo, React Navigation, Redux Toolkit, Axios, Tailwind CSS, PostCSS, Webpack, GitHub Actions.
- Designed relational schemas in PostgreSQL for CPD tracking, user activity logs, subscription records, billing state, and 5-year compliance audit history, applying indexing and query optimization.
- Architected structured content models in Sanity Studio v3 using GROQ queries, custom schemas, RBAC workflows, localization strategy, and webhook automation for multi-region deployments.
- Built scalable backend services in Node.js following REST principles with JWT authentication, RBAC, and async event processing for tracking, reporting, and subscription validation.
- Implemented hybrid rendering strategy in Next.js using SSG, SSR, ISR, App Router, API Routes, and Edge Functions, achieving green Core Web Vitals (LCP 1.8s, INP 80ms, CLS 0).
- Integrated high-performance search via Algolia InstantSearch.js, enabling unified indexing and real-time reindexing across 40K+ clinical articles, podcasts, and video content.
- Engineered frontend performance optimizations using dynamic imports, memoization, fast-dom batching, content-visibility CSS, tree shaking, and image optimization to reduce bundle size and runtime overhead.
- Implemented secure subscription flows through Stripe API and webhooks with Apple Pay and Google Pay support, enforcing server-side validation and access control logic.
- Developed cross-platform mobile applications using React Native and Expo, integrating secure APIs and synchronized CPD tracking with the backend.
- Deployed serverless infrastructure via Vercel and AWS, configured CDN caching and secure asset delivery, automated CI/CD with GitHub Actions, and delivered 21 epics within a Scrum-based Agile lifecycle.

Senior Mobile & Full-Stack Software Engineer

Jul 2020 - Mar 2023

Tepia | Costa Mesa, CA

- Delivered a cross-platform mobile and web MVP using React Native, Expo, React.js, TypeScript, Node.js, Firebase, Sanity CMS, Azure Cloud Services, and Oracle Database to validate a new InsurTech learning product.
- Designed relational data models, schemas, and stored procedures for structured customer, progress, and reward data management (Oracle Database, PL/SQL).
- Engineered backend APIs and serverless business logic for authentication, progress tracking, and rewards (Node.js, Express.js, Azure Functions, Firebase Cloud Functions).
- Implemented secure data access, real-time synchronization, and consent logging across cloud environments (Firebase Authentication, Firestore, Azure Blob Storage, Security Rules).
- Integrated dynamic content delivery and third-party media embedding (Sanity CMS, GROQ, YouTube API) with global content distribution (Azure CDN).
- Built iOS and Android applications with structured state management and reusable UI components (React Native, Redux Toolkit, Styled Components).
- Developed responsive marketing and content frontend (React.js, React Router, Axios) deployed via Azure App Service and Azure Static Web Apps.
- Implemented push notification and reminder workflows tied to lesson schedules (Expo Notifications, Firebase Cloud Messaging, Azure Notification Hubs).
- Enabled analytics and behavioral tracking to validate product-market fit (Firebase Analytics, Azure Application Insights, custom event tracking).
- Automated customer lifecycle workflows and CI/CD pipelines for rapid iteration (Mailchimp API, Expo EAS Build, GitHub Actions, Azure DevOps Pipelines).

CONTACTS

A: Plant City, FL, 33565

P: (813) 852 5213

E: ryansulli94@outlook.com

L: in/ryan-sullivan-b977a93b1

EDUCATION

Bachelor's Degree in Computer Science

University of Florida

Aug 2012 - May 2016

COMPETENCIES

- Full Stack Web & Mobile App Architecture
- Cloud-Native Development
- Composable & Headless CMS Platforms
- Scalable API Design
- Cross-Platform Mobile Development
- Performance Optimization & Core Web Vitals
- CI/CD Automations & DevOps Workflows
- Secure Authentication & Subscription Systems
- Microservices & Serverless Architectures
- Agile Delivery & Technical Leadership

SKILLS

Programming Languages

JavaScript (ES6+), TypeScript, Node.js, SQL

Front-End

React.js, Next.js 13, React 18, React Native, Expo, Redux Toolkit, Context API, React Navigation, Styled Components, Tailwind CSS, PostCSS, Webpack, Storybook

Mobile Software Engineer

Oct 2018 – Jun 2020

Mercury Development | Aventura, FL

- Defined system architecture and data flow, designed relational schema in MySQL for users, vouchers, transactions, and audit logs, implementing indexing, constraints, and optimized queries for high-volume redemption operations.
- Developed backend GraphQL API layer with authentication, voucher validation logic, transaction processing, JWT-based sessions, and OAuth flows, ensuring secure communication between mobile clients and MySQL database.
- Implemented passwordless Magic Link authentication with secure token handling and encrypted storage, integrating API abstraction layers and fallback services for resilient connectivity.
- Architected and delivered cross-platform mobile application using React Native, Expo, TypeScript, React Navigation, and Context API with modular structure and scalable state management.
- Built QR-based voucher scanning using Expo Camera with deep linking, background tasks, real-time validation, and synchronized transaction history with optimistic UI updates.
- Applied form validation with React Hook Form and Yup, developed reusable UI components via Storybook following Figma design systems, and optimized performance using memoization, lazy loading, and bundle tuning.
- Established CI/CD pipelines using GitHub Actions and EAS Build, managed releases via App Store Connect and Google Play Console, and enforced quality standards with ESLint, Prettier, Husky, Jest, and React Native Testing Library.

Full Stack Software Engineer

Jun 2016 – Sep 2018

Agency Partner Interactive LLC | Plano, TX

- Designed and implemented a microservice-based onboarding web app integrated via API into a complex headless CMS ecosystem, deployed on Google Cloud Platform (GCP) using Cloud Run and Cloud Build for scalable containerized hosting.
- Built the UI from scratch using Next.js, TypeScript, Tailwind CSS, Storybook, and Jest, with CI/CD pipelines configured via GCP Cloud Build for automated deployments.
- Developed reusable component libraries in Storybook for isolated testing and rapid stakeholder feedback, hosted within a GCP-based staging environment.
- Implemented independent progress tracking logic without modifying the existing Amplience API, ensuring secure API communication and scalable infrastructure on GCP.
- Refactored and redesigned component library mid-project to align with full platform rebranding while maintaining stable cloud-hosted environments.
- Worked in Scrum with a dedicated PM/Scrum Master and a 5-person cross-functional team, delivering iterative releases through GCP-backed CI/CD workflows.

PROJECTS

Healthcare & Medical Education Platform

<https://GNotebook.com>

Modernized and scaled GNotebook, a 100K+ page clinical reference platform, by migrating from a legacy CMS to a composable architecture built with Next.js, React, TypeScript, Node.js, Sanity, Algolia, Stripe, and Vercel, enabling high-performance delivery, multi-region content management, CPD compliance tracking, subscription monetization, and unified web and mobile experiences for medical professionals across the UK, US, Australia, and Ireland.

InsurTech Full MVP Platform

<https://veygo.com>

Led development of a cross-platform mobile and web MVP using React Native, Expo, React.js, TypeScript, Node.js, Firebase, and Sanity CMS to validate a new InsurTech learning product. The platform enabled progress tracking, personalized content delivery, push notifications, analytics-driven user behavior insights, and secure customer data handling to support rapid idea validation and risk mitigation.

SKILLS

Back-End

Node.js, Express.js, Express.js, Nest.js, RESTful APIS, GraphQL, Apollo Client, JWT, OAuth, RBAC, Async Event Handling

Mobile

React Native, Expo CLI, Expo Camera, Expo Notifications, EAS Build, OTA Updates

Database & Storage

MySQL, PostgreSQL, Oracle, MongoDB, MS SQL Server, Firestore, Azure Blob Storage

CMS & Search

Sanity CMS, GROQ, Algolia

Payments

Stripe API, Webhooks, Apple Pay, Google Pay

DevOps & CI/CD

GitHub Actions, Azure DevOps Pipelines, Docker (implied containerization), CI/CD automation

Analytics & Monitoring

Firebase Analytics, Azure Application Insights

Testing & Quality

Jest, ESLint, Prettier, Husky, React Native Testing Library
